Please join us for a technical workshop on:

# Microbial Environmental Monitoring and Chlorine Dioxide Decontamination for Food Facilities

Wednesday, July 16, 2014  
Hampton Inn and Suites  
523 Work Street, Salinas, CA

7:30 AM - 8:00 AM - Registration and Continental Breakfast  
8:00 AM - 11:30 AM - Workshop

---

## Workshop topics:

- Fundamentals concerning how microorganisms enter and become established in food production facilities
- Establishing an environmental monitoring program, techniques used and laboratory aspects as they relate to a food safety program
- Uses and history of chlorine dioxide gas
- Comparison of decontamination methods, parameters and equipment
- Case studies

## Who should attend?

- ✓ Quality Assurance and Microbiology Scientists
- ✓ Sanitation and Manufacturing teams
- ✓ Any personnel engaged in the design, execution and validation of operational aspects that affect food safety

## Speakers:

**Dr. Peyman Fatemi**, Technical Director, AEMTEK -- oversees all special projects and consultative support for the food industry. He has over 15 years of experience in multiple product categories and has published and presented many studies related to food safety and development of rapid methods for *E. coli* and *Salmonella*. He is an active member of the IFT and IAAP and has worked locally for Earthbound Farms, Life Technologies and 3M.

**Bill Soest, MBA**, Technical Sales Representative, ClorDiSys - Bill brings years of sterilization and decontamination experience to this event. His passion and enthusiasm for working in this industry provide participants a unique opportunity to learn how this process makes a difference in our world.

**About AEMTEK:** A high quality, third party laboratory that provides testing, research, training, consulting and sampling products for the food industry. The laboratory is accredited by A2LA, AIHA-ILAC and California ELAP for food, environmental microbiology and water testing, and the quality system is ISO 17025 compliant.

**About ClorDiSys:** Founded in 2001, ClorDiSys Solutions Inc. is the world's largest manufacturer of chlorine dioxide sterilization and decontamination equipment. Our chlorine dioxide gas decontamination technology provides the ability for short cycle times, quick aeration, and excellent distribution into hard to reach areas while being the safest method available.

## Details:

This workshop is complimentary and requires registration. Please register ASAP, as space is very limited.

## To register (or for questions):

Email - [dave@aemtek.com](mailto:dave@aemtek.com) or call Dave Shelep, Director of Sales, AEMTEK at 760-413-5157

Please provide your name, company, job title and full contact information. You will receive a confirmation.
